Mirai means **future**. With 15 years of experience.

Mirai Tech S.R.L. was founded on 1 January 2025, carrying on the work of FBSolutions, active in industrial automation for over fifteen years: same location, same experience, eyes on tomorrow. We design, program, install and support plants for machine builders, system integrators and manufacturers, in Italy and abroad.

Our values

Reliability

We respect deadlines, commitments and quality standards.

Expertise

We constantly train our people to ensure efficiency and safety.

Collaboration

We believe in teamwork, inside and outside the company.

Innovation

We approach every project with vision and flexibility.

Integrity

We approach every project with responsibility and transparency.

Join the Mirai Tech team

We are hiring technical staff
info@miraigroup.it

Technical people. Direct **responsibility**.

A hands-on team used to working in the field, solving real problems and supporting the customer all the way to production start-up.

Industrial automation. Expertise in the field.

Software, robotics and electromechanical skills for machine builders, integrators and manufacturers. With one concrete goal: making the plant run well in the field.

01

Industrial robotics

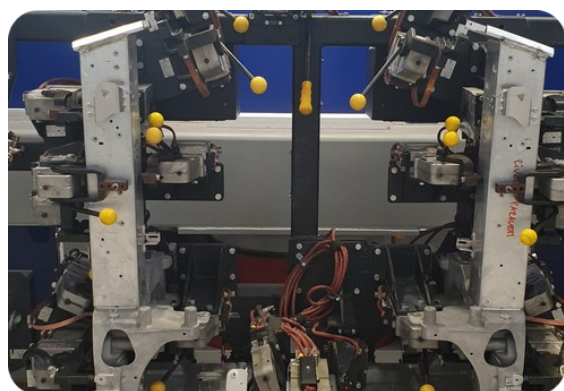

Programming and integration of Estun, Yaskawa, Fanuc and ABB robots for palletizing, handling, assembly, welding and machining.

Estun

Yaskawa

Fanuc

ABB

02

Industrial automation

Development, commissioning, optimization and support for machines and lines, with a focus on safety and motion, including existing plants.

Safety

Motion

Revamping

03

PLC & HMI

PLC software, operator interfaces, diagnostics and industrial networks on the leading market platforms.

Siemens

Rockwell

B&R

From processing to **traceability**

04

Robotic processing

Welding, deburring, grinding, milling and other processes with full process integration.

Welding

Grinding

Polishing

05

Automated logistics

Software, start-up and support for conveying, palletizing and material flows.

Handling

Palletizing

06

Vision & identification

Vision systems, code reading, inspection, verification and traceability.

Keyence

Datalogic

Platforms: we choose the tools based on the plant and the customer's standards

Logistics

Metalworking

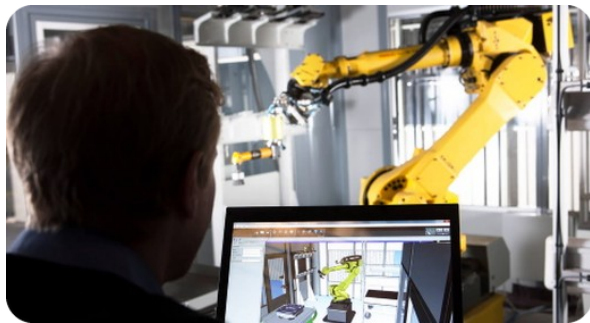

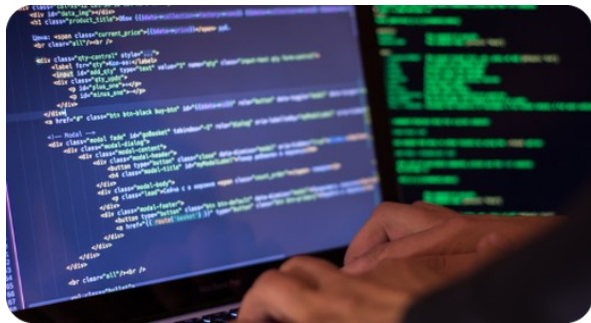

SOFTWARE AND IT

Software development

Beyond industrial automation, **Mirai Tech S.R.L.** develops custom applications for managing, supervising and tracing production processes. With our experience in languages such as **SQL** and **C#**, we integrate databases, operator interfaces and control systems into platforms tailored to every need.

- SQL
- C#
- Database
- Operator interfaces
- Supervision
- Traceability

IT infrastructure & networking

We design and manage industrial networks and IT systems.

- Data center setup and secure VPNs.
- Cybersecurity solutions.

We work anywhere in the **world**

43 countries

Mirai Tech S.R.L. can operate anywhere in the world, providing technical support and operational flexibility.

A network of reliable partners lets us respond quickly and efficiently wherever our expertise is needed.

Collaboration and shared experience are the key to tackling every project with confidence and delivering concrete results.

Robot and **electromechanical** maintenance

At **Mirai Tech S.R.L.** we provide dedicated maintenance for **Fanuc industrial robots**, ensuring reliability and operational continuity on production lines. We also handle diagnostics and troubleshooting, component replacement, wiring, installation and field service: the goal is to reduce downtime.

Our services include

01

Routine maintenance

Scheduled checks and functional tests.

02

Corrective maintenance

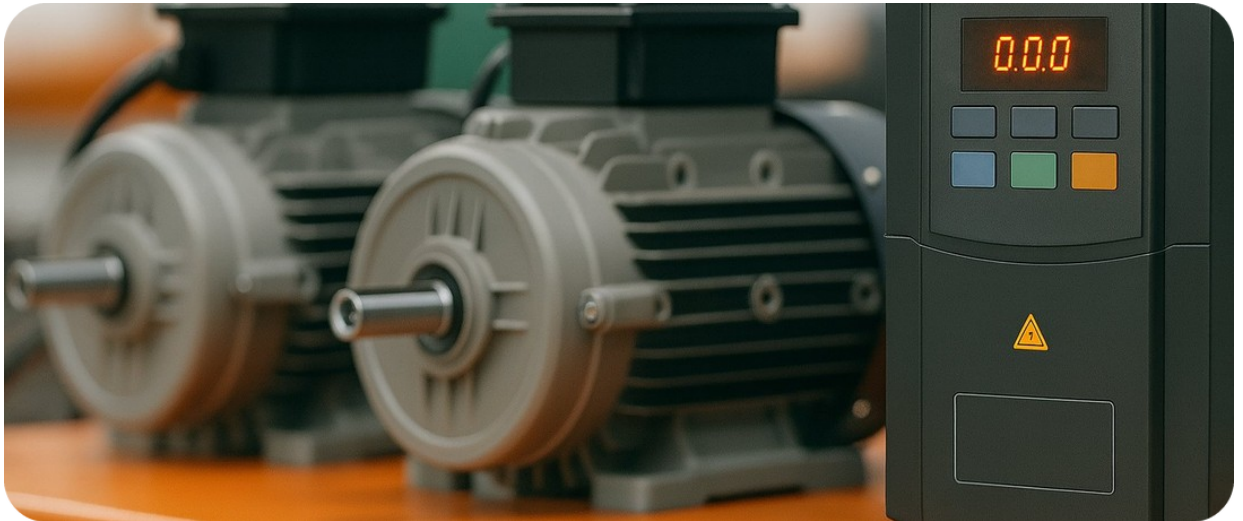

Response to faults and breakdowns, with diagnostics and troubleshooting.

03

Oil replacement

Gearbox oil change, level checks and preventive maintenance on the axes.

The right part, even when discontinued

Mirai Tech S.R.L. sources, supplies and resells spare parts for industrial automation systems. Our industry experience lets us quickly identify the most suitable components, even for older or discontinued plants.

Suppliers and partners

A network of qualified suppliers and trusted technical partners supports us to ensure short lead times and maximum reliability.

Keeping your plant running

Whether it is an electronic component, a drive or a PLC module, our goal is to ensure continuity and performance.
